South Bend Orthopaedics provides specialists in joint replacement, sports medicine & spine care

Since 1947, South Bend Orthopaedics has focused on providing every patient the best orthopaedic care available.

A Tradition of Excellence in Orthopaedics is our mission, and is reflected in our relationship with the University of Notre Dame. SBO has provided the orthopaedic surgeons for their athletic department since 1949. But you don’t have to be a trained athlete to benefit from our expertise.

At South Bend Orthopaedics our goal is to get you back in the game, whether that means sports, work, or your everyday lifestyle. We provide specialized care for our surgery and rehab patients, as well as those suffering from work-related or sports injuries. We are experts in joint replacement, sports medicine, trauma, hand, spine and foot / ankle care.

In 2010, recognizing the need for center of excellence approach for complex categories like spine care, the group created South Bend Spine located in its facility in Mishawaka, southeast of South Bend. South Bend Spine combines under one roof a multi-disciplinary team of fellowship-trained spine surgeons; non-surgical spine MDs; spine specialized therapists, diagnostics and exercise gym.

South Bend Spine is the only spine center in the State of Indiana to be included in SpineCenterNetwork.com, a national listing of credentialed spine centers.

The best quality healthcare comes from an educated consumer. As a community service, South Bend Orthopaedics distributes a free 36-page Home Remedy Book with pain-relieving stretches that help many people relieve pain symptoms at home. A 16-page Back to Life Journal provides additional information on treatment options for back and neck pain.

The center has an online spine encyclopedia at SouthBendSpine.com with pain-relieving exercises, videos about spine procedures, nonsurgical treatment options and symptom charts that show when a person needs to see a spine specialist fast to avoid permanent problems. A symptom chart reveals which symptoms need to be seen quickly to prevent them from becoming permanent.

South Bend Orthopaedics includes board-certified specialists in joint problems who are fellowship-trained in joint surgery. Treatment for joint conditions can include non-surgical care to relieve joint pain, simple surgery to alleviate joint pain symptoms and restore motion, all the way to complete replacement of the damaged joint with an artificial joint implant. The specialists at South Bend Orthopaedics are also trained in minimally invasive knee and hip replacement surgery, and make use of the most advanced surgical implants.

JOINT REPLACEMENT

South Bend Orthopaedics has provided the orthopaedic surgeons for Notre Dame Athletic Department since 1949. This same level of expertise is provided to every athlete that visits our practice. The sports medicine program at SBO includes board-certified orthopedic surgeons and physical therapists. This team take a comprehensive approach to treating sports injuries, which includes superior diagnostics, physical therapy, pain management, and when necessary, the latest surgical techniques.

SPORTS MEDICINE

South Bend Spine, located in our Mishawaka location, specializes in the treatment of back and neck pain. South Bend Spine includes board-certified orthopedic spine surgeons who are fellowship-trained in spine, non-surgical physical medicine MDs, spine diagnostics, an exercise gym and a team of spine-specialized physical therapists. More information can be found by visiting SouthBendSpine.com or by calling 574.247.9441.
